<b>Office Action Summary</b>	Application No. 10/664,035	Applicant(s) DORRELL ET AL.	
	Examiner Ghassem Alie	Art Unit 3724	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on the filing date of the application.
- 2a) ☐ This action is FINAL.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-15, drawn to a dispensing apparatus for dispensing a roll of liner-less Adhesive-backed stamps, classified in class 225, subclass 2.

II. Claims 16-28, drawn to a method dispensing a roll of liner-less adhesive-backed stamps, classified in class 83, subclass 13.

The inventions are distinct, each from the other because:

a. Inventions II and I are related as process and apparatus for its practice.

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case (2) applies because the apparatus as claimed can be used to practice another and materially different process such a process of dispensing a roll of adhesive tape or a process of separating one or more adhesive labels from a roll of adhesive labels. In addition, the process as claimed can be practiced by another materially different apparatus that does not have an accesses area defined by the space between the separation member and the hub member.

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

3. Upon election of invention I or II above, applicant is required to further elect one of the following species as set forth below.

4. This application contains claims directed to the following patentably distinct species of the claimed invention:

- Species I. Figs. 1-4A and claims 2 or 17 (each of the stamps separated by a perforation).
- Species II. Figs. 1-4A and claims 3 or 18 (each of the stamps separated by a score).
- Species III. Figs. 1-3, 4B and claims 2 or 17 (each of the stamps separated by a perforation).
- Species VI. Figs. 1-3, 4B and claims 3 or 18 (each of the stamps separated by a score).
- Species V. Fig. 5 and claims 2 or 17 (each of the stamps separated by a perforation).
- Species VI. Fig. 5 and claims 3 or 18 (each of the stamps separated by a score).
- Species VII. Fig. 6 and claims 2 or 17 (each of the stamps separated by a perforation).
- Species VIII. Fig. 6 and claims 3 or 18 (each of the stamps separated by a score).
- Species IX. Fig. 7 and claims 2 or 17 (each of the stamps separated by a perforation).
- Species X. Fig. 7 and claims 3 or 18 (each of the stamps separated by a score).

Art Unit: 3724

5. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

6. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

7. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

8. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

9. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR. 1.143).
